Summary

Results-driven **Front-End Developer** with **2+ years of experience** in building scalable and high-performance web applications using **Angular (v16-v20)**, HTML5, CSS3, and TypeScript. Skilled in implementing advanced Angular methodologies, state management with **NgRx**, and reactive programming using **RxJS**. Focused on creating dynamic, user-centric interfaces with clean, maintainable code and modern design principles. Committed to continuous learning, innovation, and delivering impactful solutions that enhance usability and performance.

Experience

Front-End Developer at Cloud4Rain

(Nov 2024 – Present)

- Led front-end development for multiple large-scale government and enterprise systems, enhancing scalability, maintainability, and user experience.
- Developed and maintained Angular applications for key government entities, including the Administrative Prosecution, Court of Cassation, Cairo Court of Appeal, and the State Lawsuits Authority.
- Implemented a comprehensive Training System with scheduled courses and integrated media management for lectures, improving content accessibility and learner engagement.
- Refactored existing projects into a Micro-Frontend architecture using **Nx (Monorepo approach)**, improving modularity, scalability, and team collaboration.
- Built an ERP system with multi-tenant support and subdomain-based routing using **Angular 20**, enabling centralized service management across clients.
- Applied advanced reactive programming patterns with **RxJS** and managed state predictably using **NgRx** to handle complex asynchronous data flows.
- Optimized performance through OnPush change detection, lazy loading, and modular architecture, ensuring efficient rendering and scalability.
- Delivered pixel-perfect, RTL-compatible interfaces from Figma designs, ensuring responsiveness, accessibility, and UI consistency.
- Collaborated cross-functionally with backend and QA teams to ensure seamless API integration and smooth deployment pipelines.

Teaching Assistant in Computer Science Department

(Feb 2023 - Feb 2024)

[Higher Technological Institute - Beni Suef]

- Mentored 200+ students, providing academic support and improving their grades by an average of 20%.
- Developed and graded 50+ assignments and exams, ensuring timely feedback and supporting course updates.
- Trained 80+ students who achieved top positions in programming competitions through Frontend and Database coaching.

Egyptian Aviation Academy MVC Training.

Successfully developed and deployed 3 web applications using the MVC framework, improving the development process by 25%. Collaborated with a team of 5 developers, analyzing project requirements and designing intuitive user interfaces, which enhanced user satisfaction by 30%. Reduced project delivery time by 15% by streamlining workflows and adopting best practices for MVC development.

Education

(NUB) Nahda University, Computer Science

09/2018 – 02/2023

Graduation Project: Developed a **University Learning System** ensuring secure online exams, offline access, and efficient content management.

Projects

- **Training System with Media Management (Cloud4Rain)** — Designed and developed a comprehensive training platform with scheduled courses and integrated media handling for lectures, enhancing accessibility and scalability.
- **Cairo Court of Appeal (Cloud4Rain)** - Developed a role-based web system for the Cairo Court of Appeal using Angular. Each user has dedicated access and data views, with modules for legal services, requests, and administrative workflows.
- **APA – Administrative Prosecution Authority (Cloud4Rain)** - Created a modern web system for Egypt's Administrative Prosecution Authority using Angular 18. Features include role-based access, service management, formations, requests, news, events, and training modules.
- **SLA (State Lawsuits Authority) – Cloud4Rain** — Developed a web application for the State Lawsuits Authority using **Angular 17**. Focused on building scalable and maintainable modules, ensuring high performance, accessibility, and seamless integration with backend services.
- **ERP System with Multi-Tenant Architecture (Cloud4Rain)** — Developed an ERP system in **Angular 20** using a monorepo structure. Implemented multi-tenant database support with subdomain-based routing and built a central dashboard for managing customer services efficiently.
- **Fangari – Cloud4Rain** — Built an interactive platform for hosting competitions, sessions, and project submissions using **Angular 17**. Designed user-friendly interfaces for participants and administrators, optimized form handling and state management, and ensured a smooth submission and review workflow.
- **E-Commerce** — Developed an innovative e-commerce platform using Angular 16. [Live] [↗](#) - [Repo] [↗](#)
- **Meal Recipes** — Developed a multi-page restaurant platform using Pure JavaScript. [Live] [↗](#) - [Repo] [↗](#)
- **Daniels Website** — Created a landing page portfolio using HTML5, CSS3, and Bootstrap. [Live] [↗](#) - [Repo] [↗](#)
- **Weather Website** — Built a weather app allowing users to check current weather conditions. [Live] [↗](#) - [Repo] [↗](#)

Skills

Languages & Core: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS

Frameworks & Libraries: Angular (v16–v20), NgRx, RxJS, PrimeNG, TailwindCSS, Bootstrap, GSAP, Angular Material, Supabase, Firebase, Redux Toolkit

Architecture & Design Patterns: Modular Architecture, Component-Driven Development, Responsive Design, Clean Code, OOP, SOLID Principles

Databases & APIs: SQL, RESTful APIs, GraphQL (Beginner), API Integration & Optimization, Postman

DevOps & Tools: Git, GitHub, Vercel, Docker (Basic), CI/CD Workflows, Firebase Hosting, Mock APIs

Web & Performance: Progressive Web Apps (PWA), Performance Optimization, SEO Enhancements, Accessibility

Soft Skills: Leadership, Communication, Problem Solving, Teamwork, Creativity, Agile Methodologies

Languages

- Fluent in Arabic (native) with conversational proficiency in English.
