Summary

Forward-thinking **Front-End Developer** specializing in architecting scalable, enterprise-grade applications with **Angular (v16-v20)**. Expertise in **Micro-Frontend architecture (Nx)**, high-performance state management using **NgRx and Signals**, and complex reactive workflows with **RxJS**. Proven track record of delivering mission-critical systems for major government and corporate entities, focused on **performance optimization**, modular design, and seamless **RTL** user experiences.

Experience

Front-End Developer at Cloud4Rain

(Nov 2024 – Present)

- **Front-End Developer** specializing in large-scale systems for major entities, including the **Administrative Prosecution, Court of Cassation, Cairo Court of Appeal, State Lawsuits Authority, and the Egyptian Syndicate of Engineers**.
- Developed a multi-tenant **ERP & HR ecosystem** and the "Waqf Al-Fanjari" portal using **Angular 20**, implementing dynamic subdomain-based routing and centralized service management.
- Contributed to the transition from monolithic to **Micro-Frontend** architecture using **Nx Monorepo**, significantly improving code modularity and maintainability across enterprise projects.
- Advanced State Management: Leveraged **NgRx** and **Angular Signals** alongside **RxJS** to streamline complex data flows and ensure high-performance reactivity.
- Performance Optimization: Applied **OnPush** change detection and lazy loading to ensure efficient rendering, while delivering **pixel-perfect, RTL-compatible** UIs from Figma designs.
- Collaborated with cross-functional teams to ensure seamless **RESTful API integration** and maintain consistent deployment pipelines.

Teaching Assistant in Computer Science Department

(May 2023 - Nov 2024)

Higher Technological Institute

- **Technical Mentor & Instructor:** Delivered specialized courses in **Frontend Development** and **Database Systems**, coaching 80+ students on modern web technologies.
- **Graduation Project Supervision:** Monitored and guided the development of multiple graduation projects, overseeing architecture decisions, code quality, and project progress.
- **Academic Support:** Mentored 200+ students through practical labs and workshops, resulting in a 20% average improvement in overall course performance.
- **Assessment Management:** Designed and graded 50+ technical assignments and exams, providing detailed feedback to ensure students' alignment with industry standards.

Egyptian Aviation Academy MVC Training

(Feb 2021)

- Successfully developed and deployed 3 web applications using the MVC framework, improving the development process by 25%.
- Collaborated with a team of 5 developers, analyzing project requirements and designing intuitive user interfaces, which enhanced user satisfaction by 30%.
- Reduced project delivery time by 15% by streamlining workflows and adopting best practices for MVC development.

Education

(NUB) Nahda University, Computer Science

Feb 2023

Graduation Project: Developed a **University Learning System** ensuring secure online exams, offline access, and efficient content management.

Projects

- **Multi-Tenant ERP System (Cloud4Rain)**

Developed a scalable ERP ecosystem using **Angular 20** and **Nx Monorepo**. Implemented dynamic **subdomain-based routing** to support multi-tenancy, providing a centralized dashboard for cross-client service management and complex business workflows.

- **Governmental Digital Transformation (Cloud4Rain)**

Architected and developed mission-critical web systems for Egypt's major legal entities:

- **Administrative Prosecution (APA):** Built with **Angular 18**, featuring role-based access (RBAC), service formations, and an integrated news/events engine.
- **Court of Cassation & Cairo Court of Appeal:** Implemented secure, role-based workflows for legal requests and administrative document management.
- **State Lawsuits Authority (SLA):** Focused on modular architecture using **Angular 17** for high-performance legal service processing.

- **Fangari Competitions Platform (Cloud4Rain)**

Built an interactive platform for hosting national competitions and project submissions using **Angular 17**. Optimized complex form handling and state management for a seamless participant review workflow.

- **Bilingual E-Commerce Platform**

[\[Live\]](#) [\[Repo\]](#)

Developed a feature-rich e-commerce application using **Angular 16**, featuring product catalogs, cart management, and responsive design.

- **Yummy Recipes Application**

[\[Live\]](#) [\[Repo\]](#)

A comprehensive multi-page restaurant platform built with **Pure JavaScript**, focused on API integration and dynamic UI rendering.

Skills

Languages & Core: TypeScript, JavaScript (ES6+), HTML5, CSS3 (SCSS/SASS).

Frameworks & Libraries: **Angular (v16-v20)**, **Signals**, **RxJS**, **NgRx**, Redux Toolkit, PrimeNG, Angular Material, TailwindCSS, Bootstrap.

Architecture & Design: **Nx (Monorepos)**, **Micro-frontends**, Modular Architecture, Component-Driven Development, OOP, SOLID Principles, Design Patterns, Clean Code.

Back-End & APIs: RESTful APIs, **API Optimization**, Supabase, Firebase, SQL, Postman, GraphQL (Basic).

Tools & DevOps: Git/GitHub, Vercel/Firebase Hosting, CI/CD Workflows, Agile/Scrum.

Web Performance: **OnPush Strategy**, Lazy Loading, PWA, Web Accessibility, SEO, Performance Profiling.

Languages

- **Arabic:** Native.
- **English:** Professional Working Proficiency.
